

Dota 2 Tournament Ruleset

Gamefest @ GT 2018

Overall Structure

- Captain's Mode
- Bring your own computer.
- Two-day tournament
- If six or less teams are present, tournament format will be round robin.
 - Each team will play every other team in a two-game series.
 - The teams with the top three win-loss records will receive prizes.
 - Ties for top three will be broken based on head-to-head matchup score. If the head-to-head matchup was tied, teams will play a tiebreaker game. Ties will continue to be broken in this way until there are no more ties.
- If seven or more teams are present, tournament format will be round robin groups followed by a single elimination playoff.

Group Stage (Day 1):

Team average solo MMRs will be recorded and two groups will be set by the head admin using this information.

Each team in a group will play a two-game series or (if the number of teams is prohibitive) one game against every other team in their group.

If the total number of registered teams is odd, the top team from each group will qualify for the playoff, as well as the second place team from the group with more teams. The second place team of the smaller group will then play one game versus the third place team of the larger group, with the winner qualifying for the playoff.

If the total number of registered teams is even, the top two teams from each group will qualify for the playoff.

Ties will be broken as above.

Playoff (Day 2):

The winner of Group A will play the runner-up of Group B in a best-of-three series. Likewise, the winner of Group B will play the runner-up of Group A in a best-of-three series.

The winners of both series will then play a best-of-five grand finals to determine first and second place, while the losers of these series will play each other in a best-of-three third place decider series.
